

# TotalTransact™

## Card

### Why Use TotalTransact for Credit Card?

- Accept card-not-present transactions through Web and phone
- Accept card-present transactions
- Process card transactions using your existing merchant card account, or open a new merchant card account through NetDeposit.
- Save expenses with a solution that costs less to acquire, operate, and maintain than self-hosted solutions

### System Requirements

- 1GB RAM minimum
- Windows 2000, XP or Vista
- Internet Explorer 6.x or 7.0
- DSL/Broadband 256 kbps or greater

## TotalTransact™ Payment Processing

### Card

*TotalTransact* Card takes credit card processing to a new level by unifying it with your overall payment strategy. Like many payment types, card processing has traditionally been done in a separate silo from other payment tools. With *TotalTransact*, all your payments can be processed through a single service, allowing you to oversee all your payment activity through a single, powerful management console.

### Receiving Credit Card Payments

By utilizing *TotalTransact*, you'll be able to process credit cards in the following ways:

- Use a swipe card reader to capture credit card transactions in card-present scenarios
- Initiate credit card payments over the phone, or in other situations where the card is not present, using a web-based "virtual terminal"
- Take credit card payments over the Internet from a secure online payment page
- Set up recurring payment plans and charge your customers' credit cards automatically based on agreed upon payment schedules
- Utilize the *TotalTransact* Web Services to integrate card processing into your application
