

Benefits

- Provide high-demand check capture and payment processing services to customers
- Reduce check processing labor and equipment costs by implementing electronic check clearing
- Get to market quickly with limited implementation effort and a lower initial investment
- Leverage our secure, SAS 70 Type II data center with full backup and disaster recovery features and trained staff
- Minimize the impact on legacy systems and reduce burden on internal IT resources for roll out and maintenance

New Markets • New Rules • New Technology™

NetDeposit's Financial Services Solutions Group delivers value to banks, credit unions, processors, and their customers by providing proven payment technologies. With multiple patents and billions of checks processed, NetDeposit's Financial Services Solutions Group helps you win new customers, grow deposits, and deliver ongoing value to your business and retail customers.

NDpro™ Payment Services

NDpro™ Payment Services allows financial institutions to offer their customers comprehensive, on-demand electronic payment solutions in an ASP environment. *NDpro Payment Services* provides the people, processes, and technologies needed to support the scale, security, and management requirements of both small and large financial institutions.

All of NetDeposit's industry-leading *NetCapture™* solutions can be deployed in the *NDpro Payment Services* environment, enabling you to get to market and in production quickly with limited implementation effort and a lower initial investment. RDC, branch capture, image cash letter receive processing and our electronic payments gateway are available to you through *NDpro Payment Services*. NetDeposit's ASP solutions are designed to interface with your legacy systems and reduce the burden on internal IT resources for roll out and maintenance. This allows you to better manage your per-item processing costs and get to market quickly with new products and services.
