

NetCapture™

Business Pro

Benefits:

- Provide a product specifically designed for businesses with complex depository and accounts receivable functions
- Enable efficient and fast deposit processing
- Build effective barriers to entry from competing financial institutions outside existing geographical footprints
- Expand market share and presence beyond the branch network
- Increase deposits and deliver revenue-generating products and services
- Evolve depository products into revenue-generating information management services
- Gain flexibility in setting cutoff times and availability of funds

Proven technologies that deliver value to banks, credit unions, processors, and their customers.

NetDeposit's Financial Services Solutions Group delivers value to banks, credit unions, processors, and their customers by providing proven payment technologies. With multiple patents and billions of checks processed, NetDeposit's Financial Services Solution Group helps you win new customers, grow deposits, and deliver ongoing value to your business customers.

NetCapture™ Business Pro

NetCapture™ Business Pro is a sophisticated remote deposit capture application that delivers advanced image deposit capabilities and accounts receivable processing functions. It is designed for corporate accounting and treasury management users who need to:

- Deposit a high volume of checks received daily and find it inconvenient to get to the bank
- Capture additional payment data associated with the check, such as customer account number, invoice numbers and invoice amount
- Enforce additional operation and audit controls over deposit preparation and release
- Centrally access intra-day accounts receivable reporting from multiple distributed locations
- Receive checks and prepare deposits in multiple distributed locations

NetCapture Business Pro enables you to win and expand existing corporate cash management business by providing a differentiated, high-end remote deposit capture application. Businesses benefit from the image-enabled workflow designed to support high volumes of checks. Business customers achieve a more efficient deposit preparation business process, which includes the ability to export payment data into their accounting and accounts receivable systems. In addition, for businesses with multiple locations, aggregated deposit and payment details are accessible real-time through a Web application. *NetCapture Business Pro* enables you to uniquely meet the requirements of your business customers, making your financial institution the clear choice for deposit business.
